About cookies

What are cookies?

Cookies are small data files sent by a website's server to a web browser, processor memory or hard drive and stored there. They can be used for a range of different purposes, such as customising a website for a particular user, helping a user navigate a website, improving that user's website experience, and storing that user's preferences and login information.

Essential and non-essential cookies

Cookies can be classified as either 'essential' or 'non-essential'.

Essential cookies: these are cookies that are either:

- used solely to carry out or facilitate the transmission of communications over a network; or
- strictly necessary to provide an online service (e.g. our website or a service on our website) which you have requested.

Non-essential cookies: these are any cookies that do not fall within the definition of essential cookies, such as cookies used to analyse your behaviour on a website ('analytical' cookies).

Session and persistent cookies

Cookies can be classified as either 'session' or 'persistent', depending on how long they last after they are placed on your browser.

Session cookies: session cookies last for as long as you keep your browser open. They expire when you close your browser.

Persistent cookies: persistent cookies expire at a fixed point in time or if you manually delete them from your browser, whichever occurs first.

First and third party cookies

Cookies can be classified as ‘first party’ or ‘third party’.

First party cookies: these are cookies placed on your device by our website domain.

Third party cookies: these are cookies placed on your device by third party website domains.

Other technologies

Web beacons

Through third-party marketing companies (Mailchimp) we also embed web beacons in our marketing emails. Web beacons are small GIF image files which enable us to track your receipt of our marketing emails, how often you view our website pages, your location, IP address and browser information. Web beacons are activated whenever you open a marketing email. Web beacons transmit data when you view them but are not capable of accessing any other information on your computer. Web beacons are not stored on your hard drive unless you download a GIF image containing them.

Some (but not all) browsers enable you to restrict the use of web beacons by either preventing them from sending information back to their source (for example, when you choose browser settings that block cookies and trackers), or by not accessing the images containing them (for example, if you select a 'do not display images (in emails)' setting in your email server).

How to opt in or out

See the section below entitled How to accept or reject cookies

Legal basis for processing: we process the information we gather from the use of web beacons in our legitimate interests (Article 6(1)(f) of the General Data Protection Regulation).

Legitimate interest: analysing the effectiveness of our email marketing campaigns.

How to accept or reject cookies

There are a number of different ways in which you can accept or reject some or all cookies. Some of the main methods of doing so are described below:

You are welcome to block the use of some or all of the cookies we use on our website. However, please be aware that doing so may impair our website and its functionality or may even render some or all of it unusable.

You should also be aware that clearing all cookies from your browser will also delete any cookies that are storing your preferences, for example, whether you have accepted cookies on a website or any cookies that are blocking other cookies.

You can find more detailed information about cookies and adjusting your browser settings by visiting www.allaboutcookies.org

Accepting or rejecting cookies

Cookie control tool

You can accept or reject non-essential cookies by using our cookie management tool. This is a caption box that appears at the top of the page, "If you wish to disable cookies on our website that are not required for site functionality, please click on the 'Decline Cookies' button to the right."

Browser settings

You can accept or reject some or all cookies (for example, blocking all third party cookies) by adjusting your browser settings. If you do not know how to do this, the links below set out information about how to change your browser settings for some of the most commonly used web browsers:

Some browsers, such as Chrome and Firefox, allow you to change your settings to browse in 'incognito' mode, limiting the amount of data placed on your machine and automatically deleting any persistent cookies placed on your device when you finish your browsing session. There are also many third party applications which you can add to your browser to block or manage cookies.
